**Assignment #3**

Student: Reeve Jarvis

Course code: DGL-103 DLU1, HML and CSS

Instructor: Frank Lu

Due Date: October 6th, 2020

Submitted: September 30th, 2020

I have tested my page, on both Chrome and Edge. As you can see in the photos below, it functions identically on either browser. There are no visible differences, and it operates as it should.

Nu Html Checker

This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change

Showing results for coach_styles.css

Checker Input

Show ☐ source ☐ outline ☐ image report | Options… |

Check by | file upload ⌄ | | Choose File | No file chosen

Uploaded files with .xhtml or .xht extensions are parsed using the XML parser.

| Check |

Document checking completed. No errors or warnings to show.

Total execution time 6 milliseconds.

Summary and Feedback

Course#: DGL-103   **Section:** DLU1   **Assn#:** 3   **Student Name:** Reeve Jarvis

It took me 2.5 **hour(s) to complete the assignment. I have learned and feel good about** 90 **%**

of the skills covered in the Chapter. From the assignment work I learnt the following:

Throughout this assignment I learned a lot about how to properly write, format, and implement CSS styles to an HTML document. I had very minimal prior knowledge on using CSS, and feel as though I came out of this assignment in a very good position. I learned certain syntax rules about how to input data for different attributes, that I was struggling with at first. I also found it very interesting learning how to change icons for list elements as well as using pseudo-classes and pseudo-elements. I also took advantage of the ability to format my code and make it look more presentable.

The difficulties I encountered with this assignment:

The difficulties I encountered were mostly focused on how to properly enter information for CSS attribute values. I struggled with understanding one of my errors at first regarding margins, as I had the values separated by commas at first. Additionally I had forgotten some ' ' along the way that were brought to my attention when I validated my code. Also the textbook has some errors, but we are debugging as we go.

The sections / topics that I would like to review further:

I plan to review CSS further, and get used to all of the interesting ways I can change the appearance of my page, however overall I feel I have a good grasp on the content.

Other comments and suggestions:

I am thoroughly enjoying your classes Frank, and feel that you have been an excellent instructor and a great help to my studies. Thank you.
